Why project management?

Studies show that over 50% of all IT projects fail. These failures not only cost millions in investments but also handicap other strategic initiatives for your company. Cincom Project Management has extensive experience in successfully managing timely, cost-effective and quality implementations, resulting in meeting the client's business objectives. In other words, Cincom offers a proven project management method for maximizing the value of your project – and ensuring success.

“Cincom’s expertise in addressing the business requirements of organizations is grounded in years of experience.”

– Doculabs

“When you can’t figure out the question, let alone the answer, Cincom’s consultant is a blessing. He developed a plan that enabled us to minimize the amount of changes in our operating system. He then provided the training, mentoring and consulting that enabled us to do the bulk of the work ourselves. Everything was on time and within budget - it was a great value for us.”

– Sean Curran, Chief of Division of Producer Price Systems, Bureau of Labor Statistics (BLS)

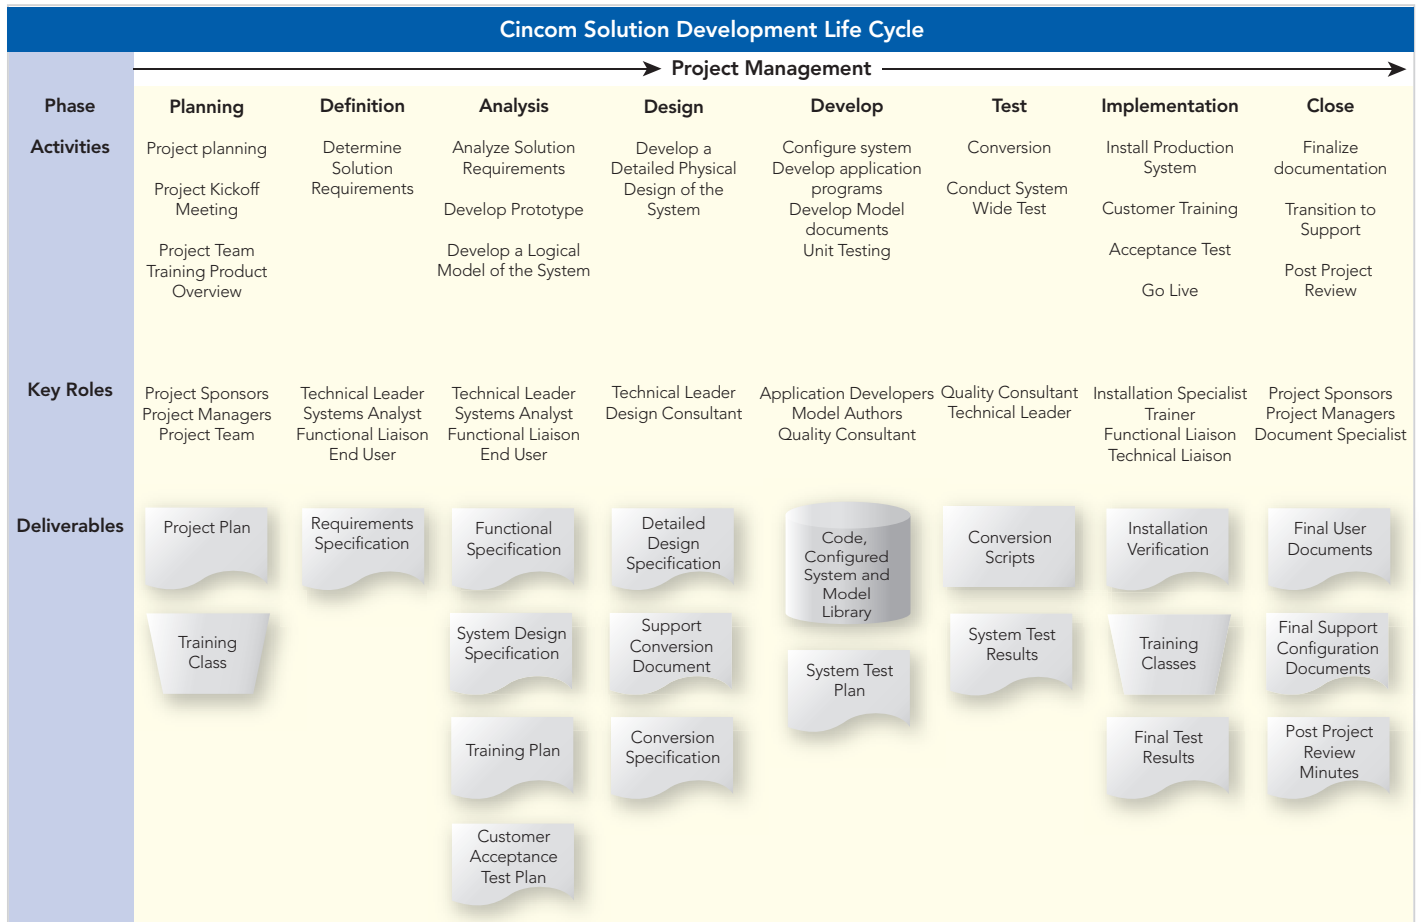

Cincom’s Proven Implementation Methodology

Help where you need it, when you need it – from people you trust

Companies make significant investments in Information Technology to achieve their business goals and objectives. Consequently, it is critical that this technology is implemented in a cost-effective and quality manner.

All too often there are impediments that undermine a successful implementation and its ongoing effectiveness. These impediments are almost always tied to poorly defined processes or roles and poor project management, resulting in problems, delays and wasted money.

Cincom project managers work with clients to optimize their ROI by decreasing the costs and risks associated with implementing systems. Cincom reduces these costs and risks by following a proven implementation methodology and thorough project management processes.

Cincom project managers are seasoned professionals with many years of experience in following a formal, time-tested, multi-phased approach.
